

GROUNDWORK | DRAINAGE | EXCAVATION CONTRACTORS

we'll take the hard work out of your groundwork

**GROUNDWORKS, CONSTRUCTION AND CIVIL ENGINEERING CONTRACTOR:
“TAKING THE HARDWORK OUT OF GROUNDWORK”**

ABOUT YOUNG CONSTRUCTION SERVICES

Young Construction Services is a professional, high quality and innovative company that has established an excellent reputation for successfully undertaking groundwork's and civil engineering projects, valued between £1,000 to £5,000,000 across the UK.

We have developed an extensive portfolio of schemes that we have successfully completed on time, within budget and to quality specifications. Many of these are high profile projects for large, blue chip companies including; **The National Trust, MGM, Rok, Tolent, Metnor, South Tyneside Council and GUS Robinson Developments** together with smaller commissions for less industry recognised organisations in the **commercial, industrial, residential, education, health, retail and leisure sectors**.

As a proactive and progressive organisation we choose to work in partnership with our clients, an approach that has proven to be very successful in ensuring all projects we undertake to the ultimate satisfaction of the client. This forward thinking attitude has proven to be invaluable to the generation of open and honest relationships with our clients that stand the test of time and result in a happy, repetitive working relationship that benefit all parties.

Our services cover all types of groundwork's at every scale. We are always pleased to provide a '**no obligation quotation**' or arrange a site visit and offer a professional consultation in relation to a specific scheme.
